# AGED BOOK

As a stakeholder in Project:

I can get rid of my old book with that website. İt will be better if books has others comments.

As a client in Project:

I can take more book from there and can Access a lot of books. Key aspect of Project is i think advertisements.

As a nothing had to do in Project:

I can look books and see if is there a one book that takes my attention.

Art Hause Online

## As a stakeholder in Project:

I can sell my arts online in this website. If there is a much more art sections. It will be better

As a client in Project:

I can take many art structures and paintings. Then ı can sell them or use for my hause.

As a nothing had to do in Project:

I can look arts and see if is there a one Art that takes my attention.
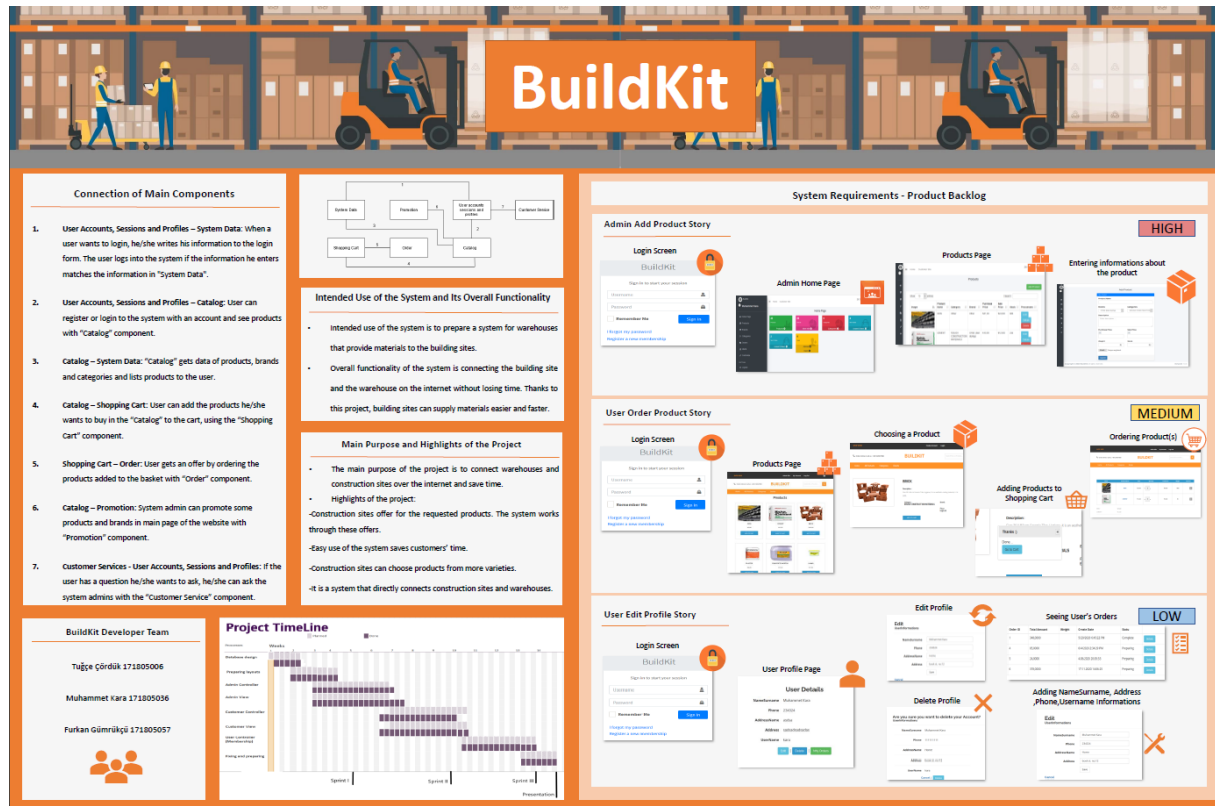

BuildKit

As a stakeholder in Project:

I can sell materials in this website. If there is a much more material sections. It will be better

As a client in Project:

I can buy many materials. Then ı can sell them or use for my hause.

As a nothing had to do in Project:

I can look materials and see if is there a one material that takes my attention.
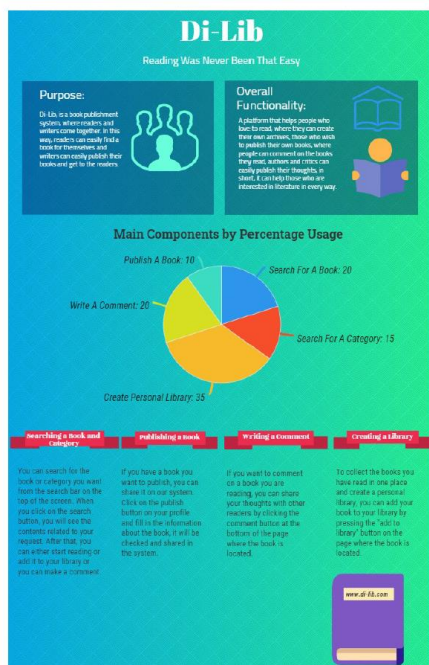

Di-Lib

As a stakeholder in Project:

I publish my books in this website. If there is a much more books sections. It will be better

As a client in Project:

I can read many books. And i can learn so much things from them. After i can use it for my job

As a nothing had to do in Project:

I can look books and see if is there a one book that takes my attention.

FM

As a stakeholder in Project:

I publish my critics in this website. If there is a much more team. It will be better

As a client in Project:

I can read many Critics. And i can learn so much things about footbal from them. After i can use it for my sport life

As a nothing had to do in Project:

I can look news and see if is there a new book that takes my attention.

Game Market

As a stakeholder in Project:

I publish my games in this website. If there is a much more game sections. It will be better

As a client in Project:

I can buy many games. I can play them. After i can play them again

As a nothing had to do in Project:

I can look new games and see if is there a new game that takes my attention.

Game Market Project
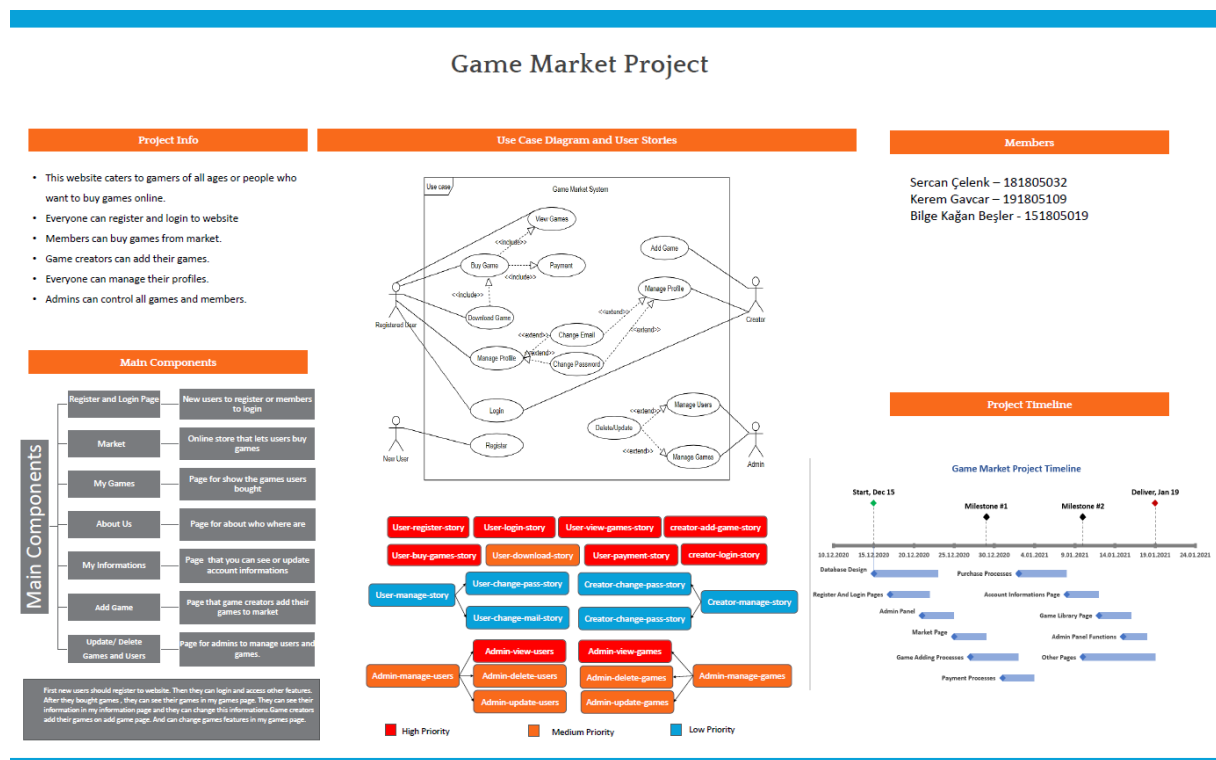

Voice Assitant

As a stakeholder in Project:

I think i cant do anything.

As a client in Project:

I can reach what i want with my voice.
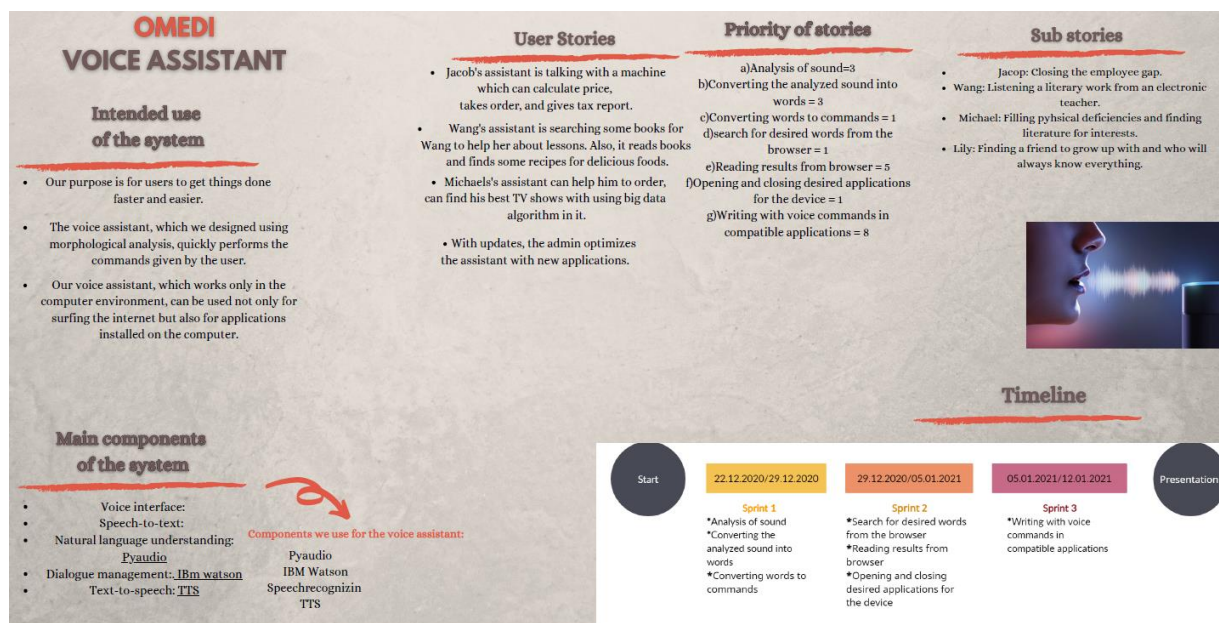

Your library

As a stakeholder in Project:

I create my library in this website. If there is a much more book sections. It will be better

As a client in Project:

I find many librarys. I can read them. After i can read them again

As a nothing had to do in Project:

I can look new book and see if is there a new book that takes my attention.
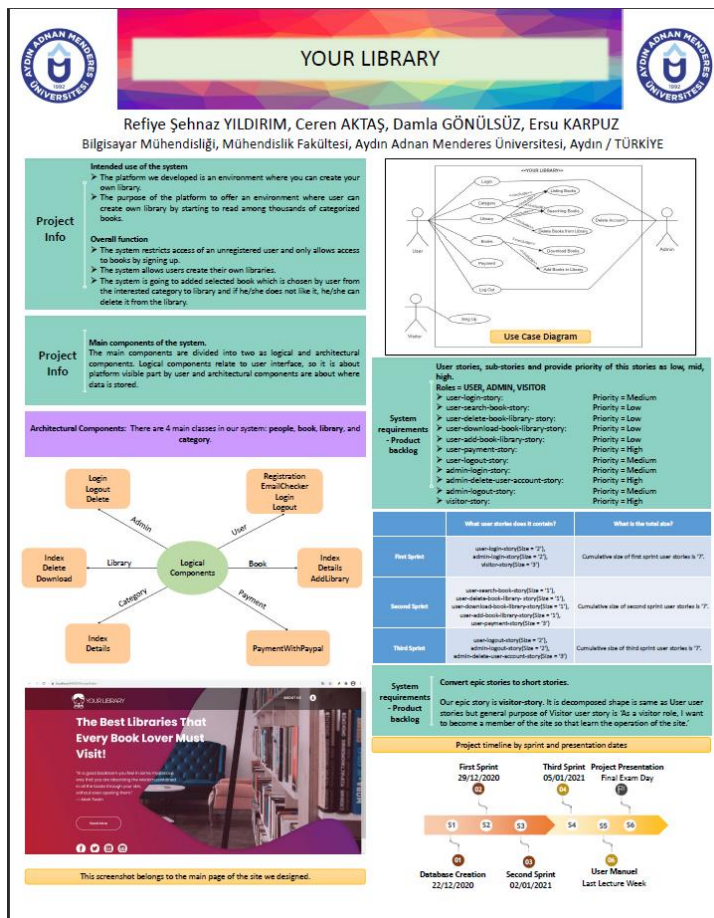

YumYum

As a stakeholder in Project:

I add my restaurants in this website. If there is a much more retaurants sections. It will be better

As a client in Project:

I find many restaurants. I can read their critics. After i can read eat in their restaurants.

As a nothing had to do in Project:

I can look new restaurants and see if is there a new restaurants that takes my attention.

Yurt Life

As a stakeholder in Project:

I add my dormitory in this website. If there is a much more dormitory sections. It will be better

As a client in Project:

I find many dormitory. I can read their critics. After i can go there

As a nothing had to do in Project:

I can look new dormitory and see if is there a new dormitory that takes my attention.

YURTLIFE DORM GUIDE

ACK Software Development Group
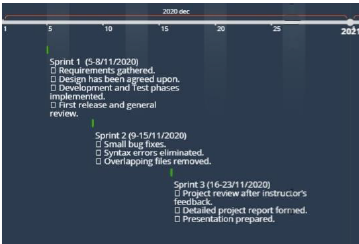

Project Purpose

Aydın Province Dormitory Guide provides freshmen and their families with information regarding dormitories located in the city of Aydın as well as help them with preregistration process.

Home Page

Timeline

Sprint 1 (5-8/11/2020)
☐ Requirements gathered.
☐ Design has been agreed upon.
☐ Development and Test phases implemented.
☐ First release and general review.

Sprint 2 (9-15/11/2020)
☐ Small bug fixes.
☐ Syntax errors eliminated.
☐ Overlapping files removed.

Sprint 3 (16-23/11/2020)
☐ Project review after instructor's feedback.
☐ Detailed project report formed.
☐ Presentation prepared.

Project Goal

Aydın Province Dormitory Guide is a website which provides the following services:
• Dormitory exploration
• Information on specific dormitories
• Registration
• Pre-Registration
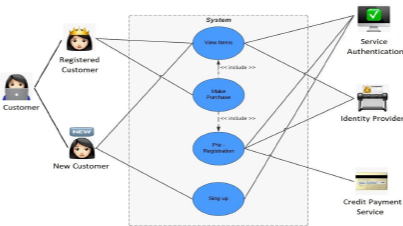

Main Components

MVC was used for developing the system. Model is made by MSSQL, the other parts are made in .NET environment.

Story Schema

User Stories

• 1. The student or one of his/her family members logs in to the website, gathers general information about the dormitories located in Aydin. (Priority: Low)
• 2. The user logs in. Selects the relevant category, male or female dorms, or flats. After browsing the options, clicks on the dormitory they like the best from the pictures. (Priority: Low)
• 3. The user logs in. Searchs for a specific dormitory by name from the searchbar. Browses the results. This features saves time to the user. (Priority: Low)
• 4. The user logs in and wants to save an appropriate dormitory for themselves. From the dorm's page, clicks on the "Add to favourites" button, this leads to the log-in page. In this page, unregistered user clicks on the signup button. After filling in the information, the sign-up process is completed and the user can access the features of the website. (Priority: Mid)
• 5. User logs into his/her account. To pre-register to the dormitory of his/her choice, he/she clicks "Pre-registration". Card information is requested for payment on the page that customer directed. After a valid card is entered, the transaction is completed. (Priority: High)

6. Already registered user logs in. On the chosen dorm's page, clicks on the "pre-register" button. This leads to the payment page, where they are required to complete the online payment. After providing a valid credit card, the transaction is completed. (Priority: High)

Karaoke Night

As a stakeholder in Project:

I add my KaraokePlace in this website. If there is a much more Karaoke sections. It will be better

As a client in Project:

I can find many KaraokePlace. I can read their critics. After i can go there

As a nothing had to do in Project:

I can look new KaraokePlace and see if is there a new KaraokePlace that takes my attention.
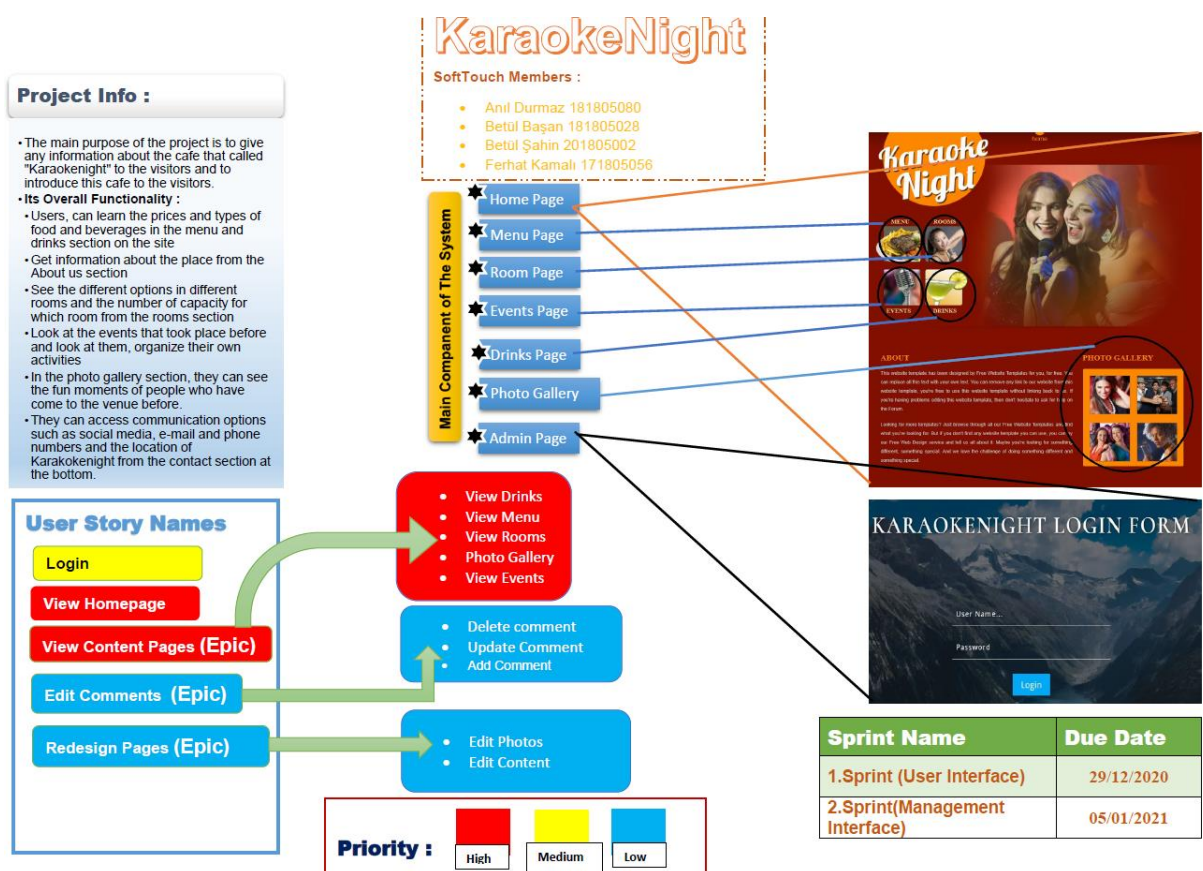

PetVet

As a stakeholder in Project:

I add my pet items in this website. If there is a much more item sections. It will be better

As a client in Project:

I can find many pet item. I can buy them.

As a nothing had to do in Project:

I can look new pet items and see if is there a new pet item that takes my attention.

SkinCoin

As a stakeholder in Project:

I add my game items in this website. If there is a much more item sections. It will be better

As a client in Project:

I can find many game item. I can buy them.

As a nothing had to do in Project:

I can look new game items and see if is there a new game item that takes my attention.

QuestionS

What is the SkinCoin?
Who can use SkinCoin?

Answers

- SkinCoin is a trading store where you can buy and sell a variety of skins and skills for online gaming platforms.
- Anyone with tradeable games with Steam and Origin accounts can use SkinCoin.

Project Overview

- In order to trade (buy or sell) on the site, you must first create a SkinCoin subscription(Membership can be created by mail, phone number and any user name you want).
- Thanks to this gamer-friendly site, you can convert the skins you earn in the game into money and earn money. We only get 5% commission per sale.
- The project is written in CSS and MsSql languages and a ready-made template is used. (With some changes on the ready template).

Main Components

- There are 9 main component pages on our site: user membership page, user login page, user posting page, listing view page, cart view page, payment page, admin login panel, admin product view panel and admin exit panel. Besides these 9 main pages, we have a few more small pages. By dividing these 9 main components into 2 groups (admin and customer), we have taken steps to ensure site integrity by combining them under 2 different home pages. The customer page does not contain a link to the admin page. For admin login, the correct e-mail and password must be entered on the customer login page and the login must be completed.

Project Timeline

Procedure for sell/Registeration/Login

Step 1	Step 2	Step 3	Step 4
We become a member from the membership page.	Login in this side.	You can add your ad by filling the required places.	Your item will be added.

Data / Observations

- Sales statistics of sites such as steam market, bynogame, bupazar, which are doing similar work with our site, are indicated with an average graph (upper right side).
- We do not yet have a study that keeps in-site (monthly report, sales report, daily earnings) data. Products marked sold in databases provide a sales report for us.
- Since the in-site products will be put by the users, the users determine the database contents.

Conclusion

- There is no disruption in the project and our site is working. We think that our site will be kept after domain acquisition.

User Stories

- Highes:
  - As someone who has registered before, I forgot my password and cannot login. There is no way for me to learn my password on the site.
  - The product I have purchased as someone who has made a purchase through the site has not been delivered to me yet. Have I been scammed? Why is my purchase still pending?
  - As an user who wants to sell, I want to be able to post an advertisement on the site without sharing my confidential information with you (TR number, telephone number, etc.).
  - As admin, I request that the daily report be sent to me by automatic mail for each post that has been sold in the system.
- Mediums;
  - Why are the items in my cart deleted after a certain period of time? I have to search and find him over and over again.
  - As admin, I want to be able to view the current profit balance from the admin panel.
  - As an user ,I do not want to always write my e-mail address while logging into the system. Is there no way I can log in with my username?
  - As an administrator, I want an admin page with different features for each administrator. I think it will be more efficient if the admin page is personalized. We can be followed more easily by top managers.
- Low;
  - As an user ,I do not want to always write my e-mail address while logging into the system. Is there no way I can log in with my username?

VetApp

As a stakeholder in Project:

I add my pet in this website. If there is a much more pet sections. It will be better

As a client in Project:

I can find many pet. I can see them.

As a nothing had to do in Project:

I can look new pets and see if is there a new pet that takes my attention.

VetApp

CREATED BY NUCLEUS

About VetApp

VetApp created for vetarinary.It helps correct treatment.If vetarinaries use this appliction,they can check the owner,kind of animal,age and old disease.

How it's working?

You can create an account to the system and log in later. It has a role-based structure. You can add, update, delete animal owner or animal according to the authority. The animal or owner can be searched by entering the name information and examined if relevant records are found.

What's the main components of VetApp?

VetApp developed in layered architecture and basically 2 different part.This are database and User(Veterinary) Page.This database will managed by user.User will be avaible to all permission to management.During the development time , we used HTML, CSS, Bootstrap,Javascript,JSP & JSTL,JPA/Hibernate,Spring Boot,Spring Security,Spring MVC,MySQL

Languages

● Java 92.7%   ● CSS 7.3%

User Stories

- User can create an account then can be able to add new owner to database.(High)
- User can delete an animal information in database.(Low)
- User can check the animal background.(Medium)
- Admin can check to all information in database(Medium)

Epic Stories

- User add new pet one of the owner.
- User delete one of the owner.
- User can delete all owner info.
- Admin can block one of the veterians on system

Product backlog

REPORT CRIME PROJECT

<u>As a stakeholder in Project:</u> Thanks to this project, not only the users but everyone in the volunteer will live more comfortably.

<u>As a client in Project:</u> My calls are returned much earlier. Instead of calling the old school police, I think I will get better results with this system.

<u>As a nothing had to do in Project:</u> This kind of incidents have not happened to me much, but now I know clearly what I can do from now on.

STOCK TRACKING PROJECT

As a stakeholder in Project: I can separate the packages more easily. Transportation also becomes less challenging.

As a client in Project: There were no errors in any of my orders with this application. The arrival time is also very short.

As a nothing had to do in Project: I cannot easily trust anyone in such works. This app is officially designed for me but I am not aware.

UNITATIS PROJECT

As a stakeholder in Project: I can share-long lasting or forced information and experiences with others.

As a client in Project: Thanks to this application, I can learn anythink I do not understand or the information I feel lacking in the course by contacting the teachers.

As a nothing had to do in Project: Az a lazy student it even increased my eagearness to learn.

UXDEV PROJECT

<u>As a stakeholder in Project:</u> I learned to make different connections, relate to each other and create something out of them.

<u>As a client in Project:</u> It made it easier for me to find channels I wanted to find. Practical in every sense.

<u>As a nothing had to do in Project:</u> I had never thought of such an idea before. I discovered that it makes me pretty easy.

MOVIE TICKET SALE SYSTEM PROJECT

As a stakeholder in Project: Sharing information about movies and getting them to viewers becomes much easier.

As a client in Project: Instead of buying tickets online, I can enter this application and get both tickets and information. Really practical.

As a nothing had to do in Project: Its impossible to completely understand a movie from the trailer. But thanks to this app I can understand if a movie good or bad.
